What is F1 in Schools?

The **F1 in Schools Challenge** is the ultimate engineering competition for teams of 3-6 students aged 11-19. Using CAD/CAM software, participants design and race miniature F1 cars powered by compressed air on a 20-meter track. Beyond speed, teams are judged on **portfolios, marketing, presentations, and pit displays**, blending **engineering, creativity, and strategy**. It's a high-stakes test of innovation and teamwork, shaping the next generation of engineers and leaders.

Who are we?

We are **Phoenix Motorsports**, an ambitious PRO F1 in Schools team driven by passion and precision. Dedicated to excelling in this prestigious competition, we pour relentless effort into every detail—from designing cutting-edge miniature F1 cars to crafting standout portfolios, presentations, and pit displays. With the Regional Finals on the horizon, we're pushing harder than ever to secure victory and prove ourselves as the ultimate team of innovators, engineers, and strategists. The track awaits, and we're ready to rise.

Manufacturing Engineer

Legacy

So far, we have been to the F1 in Schools Regional Finals where we won **First place in Development Class** and **The best Engineered Car Award** and the National Finals where we were nominated for the **Portfolio Award** and had the **Fastest Car**.

Now we are going to compete in the PRO Class Regional Finals

Sponsorship

Why do we need Sponsors?

We need sponsors which can help us **financially**, helping us cover costs such as: **competition entry fees, manufacturing costs, testing costs, software fees** etc – see fig. a for a rough cost estimate. If these costs aren't covered, we face the chance of compromising our shot at winning this competition – and that's why we need financial sponsorships.

We need sponsors that can provide **In-kind** sponsorships, sponsors which can help us with **software access, manufacturing, t-shirt printing and consulting**, or even for a service to you, to expand and develop our brand, for example giving **talks/workshops** on F1 in Schools and STEM to children at community centres or schools. This can help us cut the load we have to cover with financial sponsorships, relieving pressure from the team.

Development Class National Final Expenses (OLD)		
	Expenses	Cost
Competition	Regional Finals	£132
	Entry Fees	£175
	T-Shirts	Provided
	Power	£100
	Travel Fees	Provided
Total - Competition		£407
Manufacturing	F1 Starter Kit	
	- Model Block	
	- Axels	
	- Axel Bushes	
	- Wheels	£33
	Paint + Varnish	£4.31
	Primer	£5
	Vinyl	£5
	Waterslide Decal Paper	£8
	3D Printer Filament	Provided
Total - Manufacturing		£55
Pit-Display	Table	Provided
	Tablecloth	£8
	Lighting	£10
	Boards	Provided
	Technology	Provided
	Miscellaneous	£30
Total - Pit-Display		48
Total		£510

How does this help you?

Sponsorship helps you by presenting your business as **forward thinking** that cares about students, STEM and **future engineers** and **world leaders**.

We also **promote** your business when we go to **competitions** and other **public engagements** through our pit displays and more. If you want, you can also give us your brand's advertisements/merchandise, so on competition day we can distribute things such as leaflets presenting your business.

Sponsorship Bands

Sponsorship can take many forms, and the **return on investment (ROI)** we provide depends on the level of support. To give you a clear idea, we've outlined sponsorship bands below. However, these are flexible and open to discussion to best suit your goals and our needs.

	Price	Site	Pit Display	Shirt	Car
Bronze	Up to £500/In-Kind	Brand Shown	Brand Mentioned	x	x
Silver	£500 - £1000/In-Kind	Brand Shown	Brand Mentioned	Brand Mentioned	Logo (If possible)
Gold	£1000 - £1500/In-Kind	Brand Shown	Brand Mentioned	Medium Branding	Logo
Platinum	£1500+	Brand Shown	Large Branding	Large Branding	Larger logo
